AOA at ICO

American Optometric Association representatives visited the ICO campus on October 29 and spent the entire day and evening presenting well-planned programs designed specifically for individual classes of students.

Information and materials of special interest to each particular class - whether first, second, third or fourth year - were offered during the day-long "introduction to AOA" programs conducted during regular class hours. The evening hours were devoted to an optometric equipment exhibition and a comprehensive symposium, featuring many speakers, describing the various areas of influence and affiliate organizations of AOA in which students can become involved.

While the AOA has been a frequent visitor to the campus in the past, this was the first time AOA officials sought to reach every student in each of the four classes.

During the day-long event most students had the opportunity to learn something about this important professional organization.

The evening program was well-attended, with over 260 persons present to hear speakers discuss the AOA.

The evening speakers included Dr. Boyd B. Banwell, ICO president; Dr. Egon Werthamer, AOA secretary/treasurer; Dr. Martin Sikorski, president, IOA; Dr. John Engstrom, president, West Suburban Optometric Society; Dr. James Kluckman, Membership Development Committee and Mrs. Jan Ernstein, president, North Cook County Auxiliary, Auxiliary Liaison for IOA and ICO.

Speaking on various types of practices were Dr. Floyd Mizner, Group Practice; Dr. James Faron, Multidisciplinary Practice; Dr. James Farlik, Solo Practice, and Dr. Alex Sorkin, Survey of Practices.

While the thrust of the evening program focused on providing insights into various modes of optometric practice, the overriding theme emphasized the importance of the influence and work of the AOA and its members in championing the rights of all optometrists to practice their profession in a full-scope manner.

Students gained valuable knowledge of the many benefits available to them through AOA programs such as life insurance; credit establishment; student loan program; publications subscription and computer placement for fourth-year students.

While the AOA team encouraged students to consider what the AOA could do for them, the equally important message was "to become involved in AOA."

At the conclusion of the day's presentation Dr. Werthamer sent
(cont'd on page 2)

Dr. Henry honored by ICO

Joseph L. Henry, D.D.S., Ph.D., was honored by ICO upon completion of his successful four-year term as Chairman of the Board of Trustees.

On behalf of the entire ICO community, ICO president, Boyd B. Banwell, O.D., D.O.S., and newly-installed Board of Trustees chairman, W. Judd Chapman, O.D., D.O.S., presented a commemorative plaque to Dr. Henry

when he was feted during ICO Oktoberfest reunion weekend with a dinner at the Drake Hotel, Chicago.

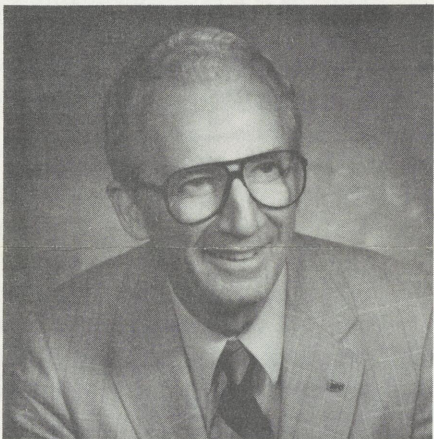

Dr. Henry currently serves as Associate Dean, Chairman and Professor of the Department of Oral Diagnosis, Harvard School of Dental Medicine and was the first non-optometric chairman in ICO's history. Dr. Henry remains on the board, having served as a member since 1973. □

ICO Illinois College of Optometry Published for alumni, faculty and friends.

Dr. Chapman new Chairman of the Board

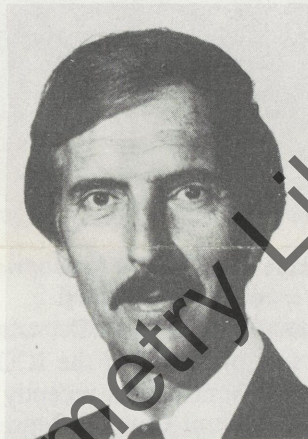

W. Judd Chapman, O.D., recently assumed the position of Chairman of the Board of Trustees of ICO. Dr. Chapman has served on the Board since 1973.

As a member of the ICO Board of Trustees for 13 years, Dr. Chapman has contributed to the success of the college during a period of unprecedented change and progress reflected by the college's new multimillion dollar campus facility.

The many professional activities in which Dr. Chapman served include his tenure as president of the American Optometric Association, 1963-1964. In addition, he served as chairman of the AOA Committee on Interprofessional Relations, was a member of the Public Information Division of the AOA Executive Committee, was founder and first chairman of the AOA Political Action Committee. He has been the recipient of many awards and honors including, "Optometrist of the South" and two honorary degrees.

Dr. Chapman resides and practices in Tallahassee, Florida. He and his wife, Delyne, have two grown children and four grandchildren. □

Dr. Jack Hill elected to ICO Board of Trustees

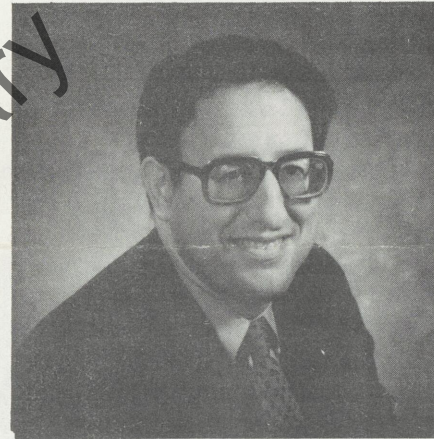

Jack F. Hill, O.D., Albion, Michigan, was recently elected to the ICO Board of Trustees.

Dr. Hill (NICO '49) has been active in optometric organizations including serving as president of the Michigan Optometric Association and chairman of the Michigan Chapter of the American Academy of Optometry. He was named Michigan Optometrist of the Year, 1967-68, and also served on the Boards of Directors of the Michigan Society to Prevent Blindness and the American Optometric Foundation.

Dr. Hill and his wife, Dr. Patricia Hill, (NICO '49) have four children. □

Dr. Woolf to ICO Board of Trustees

Howard I. Woolf, O.D., was elected a full member of the ICO Board of Trustees at the semi-annual Board meeting held during the Oktoberfest reunion weekend at the college's campus.

Dr. Woolf (ICO '67) served as president of the Alumni Association for 10 years prior to assuming his most recent duties as Alumni Council Representative to the Board.

Dr. Woolf has served as staff optometrist at Johns Hopkins University Hospital, Columbia Hospital and Clinic and as Clinical Director of the Optometric Center of Maryland. He has served as an officer of several Maryland optometric groups and is a member of the American Academy of Optometry, AOA and Optometric Extension Program.

Dr. Woolf and his wife, Barbara, and their two sons reside in Baltimore. □

Alumni Council officers re-elected

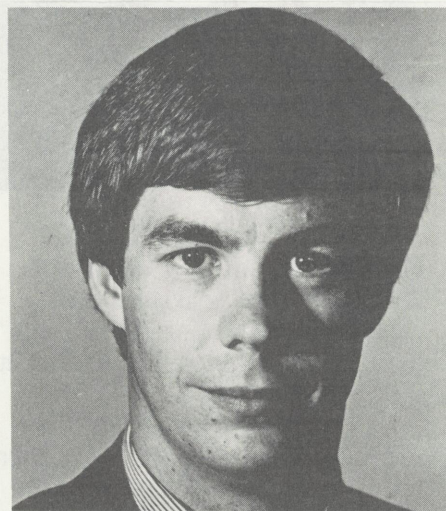

Dr. Stewart: VP of Alumni Council

James A. Stewart, O.D., Montrose, MI, who serves on the Alumni Council as director of the Great Lakes Region was recently re-elected Vice President of the Council.

Dr. Stewart joined the Alumni Council as a student representative. Following his graduation in 1980 he began his private practice in Montrose. He is a member of the Saginaw Valley Optometric Association, the Montrose Area Chamber of Commerce, the Montrose Area Historical Association and the Montrose Optimist Club.

Dr. Stewart and his wife, Nancy, have a four-year old son, Michael. □

Dr. Ransdell re-elected Alumni Council Secretary/Treasurer

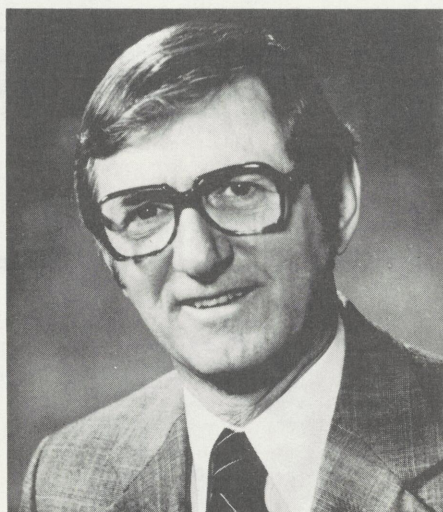

Ward R. Ransdell, O.D., who maintains a private practice in Lexington, KY, with emphasis on contact lenses, children's vision and sports vision, was recently re-elected secretary/treasurer of the

Alumni Council.

Dr. Ransdell, a 1974 ICO graduate, originally joined the Alumni Council during his fourth year at ICO and has served as State Chairman and Southeast Regional Director.

He has, in the past year, served also as secretary/treasurer to Kentucky Vision Project, a statewide version of VOSH, in addition to his activities in many organizations such as Bluegrass Society of Optometrists, Kentucky Optometric Association, AOA and American Academy of Optometry.

Dr. Ransdell and his wife, Linda, have three children; Joel, Elizabeth and Matthew. □

Dr. Hasler: Alumni Council Representative to Board

James B. Hasler, O.D., who serves as president of the ICO Alumni Council, was recently elected Alumni Council Representative to the ICO Board of Trustees.

Dr. Hasler (NICO '49), joined the Council in 1975 as director of the East Central Region. He has been president since 1983.

In addition to his service to ICO, Dr. Hasler has been involved in other professional organizations such as AOA, North Central States Optometric Council (as president), Wisconsin Optometric Association, South Central Optometric Society and as chairman of the Wisconsin State Board of Examiners in Optometry.

Dr. Hasler and his wife, Elizabeth, have five children. Their son, Philip, was graduated from ICO in 1986. □

AOA representatives (cont'd from page 1)

out the challenge to all optometric students in considering their future and that of the profession. The summation of the message was simple. The profession needs the help of its members working through the various organizations of the AOA, to keep the profession strong.

In addition, the AOA needs the support and interest of soon-to-be optometrists in order to continue to

fully represent the profession's interests in the community. With 54 affiliated organizations within the AOA, there is ample opportunity for every individual to make a contribution of time and effort at some level.

The AOA wants students - and alumni - to remember and act on this thought for achieving professional goals; "If it is to be, it is up to me." □

EYE SPY Profiles ICO Alumni: Drs. Maley and Peck

Name: Sandra J. Maley, O.D., ICO Class of 1976.

Current Residence: Phillips, WI. Born in Wausau, WI.

Practice: Private practice in Phillips, WI.

Family: 3 daughters; Kelly, 10; Jessica, 9; and McKenzie, 5. "Because of them I am a Girl Scout leader, 4-H leader and Sunday School Teacher. I am also an avid fan at their soccer and basketball games."

Professional Activities: Dr. Maley is a member of the American Optometric Association, Wisconsin Optometric Association and the Wisconsin Valley Optometric Society.

Local Activities: She is a member of the Phillips Chamber of Commerce, Homemakers of America and the founding chairperson for the Phillips Jaycettes.

Honors: Dr. Maley is a member of Gamma Omega Phi fraternity; has been listed in "Who's Who in American Colleges and Universities" and "Who's Who in America." She is a member of Tomb and Key Honor Society, A Gold Key Recipient, and was graduated Magna Cum Laude.

Remembrances of years of ICO: "I loved every minute of it. Of course it didn't hurt being 1 of 10 women in the class of 1976. It seemed like everyone treated me like 'one of the guys,' and I had a ball. In my senior year, I was expecting. In fact (my daughter) Kelly was due on graduation day! We had a class lottery to guess whether I would or would not make it. My husband and I had decided to wait until I was through with school to have children, so two days after graduation Kelly was born."

Favorite professor(s): "I was a math major prior to coming to ICO so Dr. Tennant stole my heart. Drs. Shansky and Shulman also stand out, but I enjoyed the whole educational experience and I think everyone did their job well."

Comments on professions: "I think Optometry is wonderful. It has been good to me. It is a great (profession) for a woman. We can be a productive, vital part of our community and still be able to raise our family."

Plans for the future: "I have no immediate need for change in my plans—just continual growth in my children's life and mine."

Name: Glenn M. Peck, O.D., NICO Class of 1936.

Current Residence: Fort Madison, IA. Born in Monticello, IL.

Family: Married for 50 years to Terry Sullivan Peck, O.D., (NICO, '36).

Together the Pecks had a private practice for 21 years when Dr. Terry Peck retired and the couple's son came into the practice. The Peck's have two children and three grandchildren.

Professional Activities: Past chairman Policy Committee for State Association; past president of Zone Association; past president of local optometric association; past president of Beta Sigma Kappa, Iowa. His wife, Terry, was on the Board of Examiners for 9 years and was president of the board for three years.

Local Activities: Dr. Peck is the past president of the Lions Club and a local country club. He is on the Board of Directors of the Chamber of Commerce, Industrial Development Committee and Retail Committee. He is also District Governor for Lions International, a member of the Mason's, Commandery and Shrine; treasurer for the First Methodist Church and on the Board of Directors for the same.

Remembrances of years at NICO: "Of course my biggest remembrance is falling in love with one of the girls in my class, whom I later married. I went to school five mornings a week and worked in a grocery store in the afternoons and on Saturday. My Sundays were spent studying. As I look back on those tough years I feel it was good for me because it forced me to concentrate on my lessons. I graduated Cum Laude, which I am very proud of, and it showed me that if I buckled down I could achieve anything I wanted."

Favorite Professors: Dr. Ochiena, "because he was so lovable and was like a father to all of his students," and Dr. Heather, "who was the head of the clinic and a very dynamic man. I was determined to have the personality that he had, and I feel I have succeeded in this desire."

Comments on the profession: "When we graduated, all you had to do to be a 'real' doctor was locate on the second floor of a building with your name lettered on the window. Back in those days optometry was still pretty much a trade. Through the years we have reached the true professionalism that we were fighting for back when I graduated. I feel optometry has grown faster than any other profession, and by upgrading the various Optometric colleges, we now graduate 'real' doctors. My feeling is that in the future, Optometry will do everything except major surgery."

Plans for the future: Dr. Peck is in the process of remodeling his office and adding five rooms. He is also enlarging his dispensary to three times its present size and having it operate as a separate business from his practice. According to Dr. Peck, he has "no plans for retiring because (he) is enjoying optometry more now than (he) did 30 years ago!" □

'Sunday Seminar CE Series'

ICO has inaugurated a Sunday Seminar Continuing Education Series which began January 18, 1987 and will continue until September 20, 1987.

The convenience of the time, combined with the diversity of the topics, ensures a successful series which will benefit many.

The proceeds from the CE series are used exclusively to support the College's Presidential Scholarship Awards. This program will provide assistance each year for up to ten academically and otherwise worthy students.

Plan now to attend as many of the Sunday Seminar CE Series as possible.

March 15, 1987

Update on Strabismus & Amblyopia

1. Diagnosis and Treatment of Functional Amblyopia *Susan Cotter, O.D.*—A practical approach to the diagnosis and treatment of functional amblyopia will be discussed including psychometric visual acuity measurement. Emphasis will be placed on when and how to treat patients of different ages. (2 hrs.)

2. Detection & Management of Strabismus *Susan Cotter, O.D.*—An update of clinical procedures that lead to improved diagnosis and measurement of strabismus will be discussed. New methods for detecting small-angle strabismus which can easily be utilized by the primary care practitioner will be presented. (2 hrs.)

3. Treatment of Intermittent Exotropia *Kelly Frantz, O.D.*—A systematic clinical approach for the management of intermittent exotropia (or high exophoria) using simple and efficient vision therapy techniques will be presented. A home-oriented approach allows all practitioners to effectively treat this common binocular vision disorder. (1 hr.)

April 26, 1987

Ocular Emergencies

1. Angle Closure Glaucoma *John Baker, O.D.*—This one hour presentation will cover the diagnosis and management of angle closure glaucoma. The various types of angle closure, patient symptoms and therapy regimens will be discussed. (1 hr.)

2. All those Abrasions *Jon Batzer, O.D.*—Blunt and penetrating trauma to the eye is a common presentation to the eye care practitioner. Clinical manifestations of ocular trauma will be discussed with an emphasis on short and long term effects of blunt trauma. Diagnostic techniques as well as optometric management will be covered. (1.5 hrs.)

3. Retinal/Vascular Emergencies *Leonard Messner, O.D.*—Painless loss of vision in one eye may be attributed to a variety of retinal and vascular abnormalities. Sight and life threatening sequelae may develop if immediate diagnosis and treatment is not obtained. This presentation will offer a practical approach to the assessment of these problems. (1.5 hrs.)

4. Chemical Burns *Stephanie Messner, O.D.*—Chemical injuries to the eye consist of acidic and alkaline burns. Prompt recognition and treatment of these conditions is imperative to prevent permanent loss of vision. Pharmacologic therapy, surgical intervention, and other aspects of patient management will be discussed. (1 hr.)

June 28, 1987

Vision and Learning

1. Non-Educational Diagnosis of Reading and Learning Disabilities *Brian Caden, O.D., M.A.*—This lecture will review the non-educational diagnosis of children with reading and learning disabilities. Non-educational factors such as vision, hearing, nutrition, neurological deficit, brain damage, endocrine problems as well as educational policy will be discussed. The role of the optometrist in a multi-disciplinary approach will be emphasized. (1 hr.)

2. Binocular Disorders and Visually Related Learning Problems *Michael Zost, O.D.*—This course will investigate the interrelationships between non-strabismic binocular vision disorders and learning problems. Topics to be discussed will include refractive error, fixation disparity and aniseikonia. (2 hrs.)

3. Dyslexia Up-Date *Brian Caden, O.D., M.A.*—This course will present historical as well as current concepts of dyslexia. The optometric diagnosis of dyslexia using the Dyslexia Determination Test (DDT) will be discussed. The optometric management of the patient with dyslexia in a multi-disciplinary setting will be presented. (2 hrs.)

August 16, 1987

Assessing the Infant and Other Specific Problems

1. Up-Date on Normal Visual Development *Sandra Block, O.D.*—This course is an in-depth presentation of the normal visual development of the infant. Visual acuity, accommodation, refractive error, oculomotor, and the development of binocularity will be reviewed in order to help the practitioner understand the infant's visual capabilities. (1.5 hrs.)

2. Associated Syndromes of Special Populations *Dominic Maino, O.D., M.Ed.*—This course will review the various categories/syndromes associated with special populations (the mentally/multiple-handicapped) and discuss associated organic, pathological, functional, and perceptual anomalies, patient management, and treatment. (1.5 hrs.)

3. Examination Techniques *Sandra Block, O.D.*—This presentation will cover specific techniques that evaluate the infant's visual system. Descriptions of the test procedures as well as the pros and cons of using the various techniques will be discussed. The participants will have the opportunity to view the equipment. (2 hrs.)

September 20, 1987

Binocular Disorders... Diagnosis & Treatment

1. Diagnostic Approaches *Darrell Schlange, O.D.*—This course will present the theoretical background of

binocular disorders that patients may present to the optometrist. Signs and symptoms of accommodative and vergence disorders will be presented with the appropriate treatment recommendations. (2 hrs.)

2. In-Office Treatment Strategies *Stephen Beckerman, O.D.*—This course will include an introduction to the use of vision therapy for the rehabilitation of non-strabismic binocular disorders. The course will include programming and implementation of practical in-office therapy procedures. A portion of the course will deal with demonstration of specific techniques and equipment commonly used in therapy programs. (1.5 hrs.)

3. Vision Therapy in the Adult Patient *Michael Zost, O.D.*—This course will deal with those techniques used to rehabilitate the visual systems of adults with non-strabismic binocular disorders. The essentials of a home therapy program will be covered. (1.5 hrs.)

Registration

Regular registration is due **one week** prior to the program date.

Late registration—as there has been a significant increase in the number of persons who register at the door, a charge of \$10 will be assessed to defray additional overhead costs for late registrants.

Cancellation policy—a fee of \$10 will be assessed for cancellations received later than 72 hours prior to the program date. □

CE courses for 1987

In addition to the Sunday Seminar Series, ICO is presenting six programs between now and December, 1987.

January 10 - March 1, 1987

Diagnostic pharmaceutical agents

June 10-17

Current concepts in optometry

June 20-24

Reunion weekend CE

November 15

to be announced

December 3-6

to be announced

For information contact:

Mrs. Barbara Buglio, Continuing Education Coordinator, Illinois College of Optometry, 3241 S. Michigan Ave., Chicago, IL 60616, (312) 225-1700.

ODs to interview grads

Alumni and other practitioners are invited to participate in the ICO On-Campus Interviews Program which will begin next month.

This program enables practicing optometrists to meet and interview graduating optometric students for possible professional associateships or purchase of practice. Interviews will be held in a college conference area.

Doctors may meet with any number of students, on a one-to-one basis, to discuss possible association.

Scheduled 1987 interview dates are: (interviews will be held from 1 p.m. to 4 p.m.) March 11, April 15, March 18, May 6.

Those doctors who wish to visit ICO to meet and interview students should contact Dr. Wodis in the placement office at the earliest opportunity. Doctors may use the coupon "Graduate Being Sought." (see page 5) Simply fill in and return to Dr. Wodis. Or phone Dr. Wodis; at (312) 225-1700, ext. 680.

Turn to pages 4 and 5 for a special "Graduate" feature. □

The Class of 1987: Pursuing Optometric Careers

The Class of 1987 is preparing to enter the ranks of the optometric profession following graduation ceremonies on May 17, 1987.

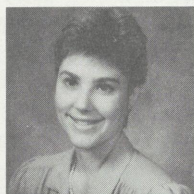

The ICO Placement Office is proud to present those graduating students who have expressed a wish to appear in a special *Image* section. The feature includes, not only a photo of each candidate, but biographical information, together with optometric specialty skills and geographical practice preferences.

Alumni and friends of ICO are encouraged to consider ICO graduates to fulfill practice openings, purchases or associateships. On-campus interviews may be arranged to enable practitioners to personally meet prospective associates from the class of 1987.

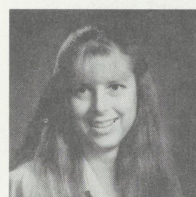

For those wishing to arrange an interview or discuss the placement opportunities please contact ICO's Director of Placement, Dr. H.S. Wodis. You may phone the Placement Office at (312) 225-1700, ext. 680, or use the coupon appearing on page 5 or secure assistance for the interview program.

Graduates available for placement

ICO alumni have a unique opportunity to contact graduating students who will be available after May 17, 1987, for full-time career opportunities.

The ICO Placement Office is eager to assist in bringing together practitioners and prospective associates.

To take advantage of this Placement Service, please fill in the form below and return it at your earliest opportunity.

Graduate Being Sought

Please check the type of situation you are seeking to fill:

- ☐ Associateship ☐ Associateship leading to eventual purchase of practice
☐ Purchase of practice ☐ Other

Location of practice:

October

ICO'S SECOND ANNUAL ALUMNI REUNION

erfest

N OCTOBER 17-19, 1986

ICO's Second Annual Reunion

The beautifully crisp weather of Chicago's autumn, underscored the conviviality of ICO's Second Annual Reunion held on campus October 17-19, 1986.

More than 200 alumni and friends from across the country, with representatives from classes stretching back 50 years or more, joined together to celebrate their profession, their school-years and their shared commitment to the future of optometry.

This year's event highlighted members of the classes of 1936, 1946, 1961, 1976 and 1981, who were celebrating "landmark" anniversaries. Representatives from these classes, as well as those from every other class, enjoyed the authentic "Alpine Oktoberfest" luncheon festival and Saturday evening dinner dance at Chicago's Westin Hotel.

Those attending enjoyed the week-end of social and educational events so well plans are being made to attend the Third Annual Reunion Homecoming which will be held on October 9-11, 1987, at the spectacularly renovated Chicago Hilton Hotel and Towers.

Mark your calendar now and plan to join the throng who will gather this year to celebrate being part of the ICO community.

IMAGE WINTER 1987/7

American Academy in Canada

More than 25 ICO faculty members, graduates, and fourth-year students, attended and participated in, the 1986 annual meeting of the American Academy of Optometry in Toronto, Ontario, December 11-16.

The first three days of the meeting, entitled "Ellerbrook '86", included a continuing education program consisting of 100 lectures and 14 "hands-on" workshops. Among those presenting programs was David A. Greenberg, O.D., M.P.H., ICO Professor of Optometry and Vice President for Academic Affairs and Dean, who taught, "Patients at Risk", a class detecting early warning signs and symptoms and

their prognostic value. Dominick M. Maino, O.D., M.E.d., ICO Assistant Professor of Optometry, presented a class titled, "Computer Applications in Binocular Dysfunction" dealing with computer terminology and the hardware and software advances in treatment of binocular vision anomalies. Alfred A. Rosenbloom, O.D., M.A., who retired from ICO in June, 1986, presented "Geriatric LV Patient", where the physiological, psychological and ocular health aspects of the visually impaired elderly, was discussed.

In addition to the presentations, an exhibition featuring the latest in ophthalmic technology, products and

scientific posters was available. These provided an opportunity to observe and learn the latest developments in the profession. A valuable component to the meeting was the presenting of over 150 original research papers and display posters by practitioners and vision scientists from around the world.

Following is a list of ICO participants.

Darrell D. Schlange, O.D., *Associate Professor of Optometry*

Kelly K. Frantz, O.D., *Assistant Professor of Optometry*

Sandra S. Block, O.D., *Assistant Professor of Optometry*

Susan S. Cotter, O.D., *Assistant Professor of Optometry*

Susan S. Kelly, O.D., *Assistant Professor of Psychology*

Janice J. Scharre, O.D., M.A., *Associate Professor of Optometry*

Debbie L. Hettler, O.D., M.P.H., *Associate Professor of Optometry*

David Lee, O.D., Ph.D., *Assistant Professor of Optometry*

Leonard V. Messner, O.D., *Assistant Professor of Optometry*

Dennis W. Siemsen, O.D., *Assistant Professor of Optometry*

Gary A. Leshner, O.D., Ph.D., *Assistant Professor of Pharmacology and Toxicology*

Anastas Pass, O.D., M.S., *Assistant Professor of Optometry*

Susan A. Cotter, O.D., *Assistant Professor of Optometry*

Dominick M. Maino, O.D., M.Ed., *Assistant Professor of Optometry*

Stephanie S. Messner, O.D., *Assistant Professor of Optometry*

Joan Polcar Stelmack, O.D., *Adjunct Clinical Assistant Professor of Optometry*

John L. Baker, O.D., *Assistant Professor of Optometry*

Stuart P. Richer, O.D., *Adjunct Assistant Professor of Optometry*

Susan Ann Kelly, Ph.D., *Assistant Professor of Psychology*

Derrald G. Taylor, O.D., *Associate Professor of Optometry*

Bruce A. Teitelbaum, O.D., *Clinical Assistant Professor of Optometry*

Debbie L. Hettler, O.D., M.P.H., *Assistant Professor of Optometry*

Thomas R. Stelmack, O.D., *Assistant Professor of Optometry* □

Dr. Banwell attends ASCO meeting

On October 24-26, a meeting of the Board of Directors of the Association of Schools and Colleges of Optometry (ASCO) took place in Memphis, Tennessee. ICO President, Boyd B. Banwell, O.D., D.O.S., and David Greenberg, O.D., M.P.H., ICO Vice President for Academic Affairs/Dean, were present. Among the topics which the directors discussed, was, "Scope of education in the year 2000."

Members of the Board of ASCO

believe it is necessary to look toward the needs of the future. Therefore, the group plans to continue to reappraise curriculum, facilities, laboratories, and clinical resources at optometric schools and colleges.

It is believed that future optometric training should result in students who are evaluated more on concepts and critical thinking, rather than on pure memorization of facts. In addition, communication abilities should be given the atten-

tion required for such critical skills. Course work in the social sciences and humanities would go far toward helping create a well-rounded individual upon graduation.

The members of ASCO also discussed the necessity of training students as clinical managers who are comfortable in utilizing data analysis in personnel and business management.

While keeping the traditional optometric subjects available to students, new technologies should be taught to enable students to remain current with the advancing technologies. The concepts of community involvement, political awareness and activity are also areas to be stressed in student education.

The overall goal of professional curriculum development is directed toward realizing the advancement of the optometric professional, as well as enhancing individual optometric practices of the future. □

In Memoriam: Melanie Ann Dupukat

Melanie Ann Dupukat, of Downers Grove, IL, loving wife of ICO Board of Trustees member, Dr. Thaddeus Dupukat (ICO '60), passed away January 7, 1987, following a long illness.

Mrs. Dupukat assisted her husband in his practice and was involved in many community and educational activities in Downers Grove, including the D.G. Women's Club. She also participated in various activities and programs at her sons, Brian and Todd's school, St. Mary's. She served in St. Mary's

Home School Association and Room Mother's Group.

Known and appreciated for her dedication to her community and family, as well as for her strong, positive outlook on life, Mrs. Dupukat will be greatly missed.

The entire ICO community extends sincere condolences to Mrs. Dupukat's family and friends: Dr. Dupukat; sons, Brian and Todd; parents, Mr and Mrs. Stanley Gadomski, and parents-in-law, Mr. and Mrs. Stanley Dupukat. □

In Memoriam

ICO is saddened at the death of the following alumni:

Douglas R. Baxter, O.D., NICO, '49, Vancouver, B.C.
John C. Brannan, O.D., NICO, '48, Boulder, CO
Arthur P. Cherney, O.D., NICO, '45, Warren, MI
Pierre O. Dickinson, O.D., NICO, '47, Aberdeen, SD
Carl H. Elsner, O.D., NICO, '37, Crete, NE
Chester B. Emmitt, O.D., NICO, '33, Oklahoma City, OK
Byron B. Fishman, O.D., NICO, '40, South Euclid, OH
Elliott B. Forrest, O.D., NICO, '49, N. Massapequa, NY
Clement J. Goyke, O.D., NICO, '44, Mt. Clemens, MI
Victor C. Johnston, O.D., NICO, '50, Anoka, MN
Edward J. Kutay, O.D., Monroe, '48, Berwyn, IL
Robert J. Lajiness, O.D., NICO, '48, Maumee, OH
Kate E. Lamb, O.D., NICO, '24, Mason, MI
Helen C. Lazarski, O.D., NICO, '31, Westmont, IL
David R. Lombart, O.D., NICO, '49, Norfolk, VA
Harold R. Murphy, O.D., Monroe, '46, Sterling, IL
Thaddeus R. Nowak, O.D., Monroe, '47, South Holland, MI
Virgil H. Ormsby, O.D., NICO, '37, Richmond, VA
David H. Robinson, O.D., NICO, '48, Apache Junction, AZ
Calvin H. Rustad, O.D., NICO, '49, Grand Forks, ND
Ted R. Schwartz, O.D., CCO, '49, Chicago, IL
Marcus L. Snow, Sr., O.D., CCO, '50, Fort Meyers, FL
George Vodian, O.D., NICO, '32, Pueblo, CO
Charles Sidney Whitaker, O.D., '27, Nashville, TN

Dr. Banwell presents certificate to Nancy Kroeger

Nancy S. Kroeger, Manager, ICO Bookstore, is shown accepting the Basic Services Certificate of the National Association of College Stores, Inc., presented by Dr. Boyd B. Banwell, ICO President. The Certificate, earned by Ms. Kroeger, marks completion of a specialized course of training designed to enhance college store operations. As many alumni, as well as others in the optometric community, utilize the services of ICO's bookstore, we wanted our readers to know that Ms. Kroeger and her staff have invested time and effort to provide the best possible service to our ICO community. Congratulations, Nancy Kroeger.

ICO/IEI Contact Lens Service

In the beginning there were only spectacles; and folks were pleased enough to have their vision restored to a functional level with a generic, wire-framed pair of glasses.

However, today's patients have far greater options when it comes to correcting vision. The array of fashion frames is virtually limitless, but even more enticing is the possibility of vision correction without frames of any kind, but rather with contact lenses.

The ICO/IEI Contact Lens Service provides state-of-the-art contact lens care year-round to Chicagoland patients.

With daily hours from 9 a.m. until as late as 7:30 p.m. two days per week, the on-duty staff of 2 faculty members, 4-8 student clinicians, 3 clerical support staff and several student workers, is kept busy servicing up to 40 patients per day.

The contact lens service handles patients from the general clinic as well as referrals from optometrists and ophthalmologists.

"I feel we have the finest group of contact lens people anywhere," says Dr. Neil Hodur, Associate Professor of Optometry.

"We see many of the 'difficult to manage' contact lens cases," says Dr. Hodur. "Such as patients with keratoconus; high refractive error; presbyopia; and anisometopia. We also see infants and children. We have fitted infants as young as 6 months of age with contact lenses."

The faculty staff, which rotates in the clinic, consists of Dr. Janice Jurkus, Chief, Contact Lens Service; Dr. Hodur; Dr. Thomas

Cedarstaff, Asst. Professor of Optometry; Dr. Gary Gunderson, Asst. Professor of Optometry; Dr. Neil Gailmard, Clinical Asst. Professor of Optometry; Dr. Debbie Hettler, Asst. Professor of Optometry and Dr. Jerold Silverman, Clinical Asst. Professor of Optometry.

With contact lens technology continuing to improve, studies testing contact lens designs and materials, such as the one Dr. Hodur is currently involved in, will bring new options to ICO/IEI patients seeking the highest quality eye care and contact lenses.

The ICO/IEI contact lens team of faculty and student clinicians is becoming known in the Chicago area for its excellence in diagnosis, fitting and follow-up care. With more and more patients opting for the outstanding corrective capabilities and comfort of contact lens, this ICO/IEI clinic has a significant potential for continued growth in the years ahead. □

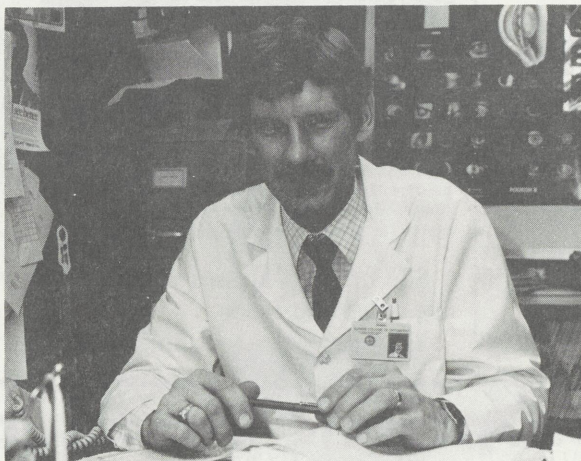

IEI has new B & L lane

Illinois Eye Institute (IEI) has received a complete refracting lane, utilized in the "Bausch and Lomb Room" of the Contact Lens Clinic, through the College Lane Program of Bausch & Lomb, Inc. Shown above with the new auto refractor and auto keratometer are (l. to r.) Mr. Robert Aguair, Bausch & Lomb, Institutional Account Executive; Dr. Janice Jurkus, Chief Contact Lens Clinic; Mr. John Conroy, ICO fourth-year student; and Mr. David Reischer, Bausch & Lomb Professional Accounts Executive.

"The college has the use of the examining lane for one year," said Dr. Jurkus. "The lane includes

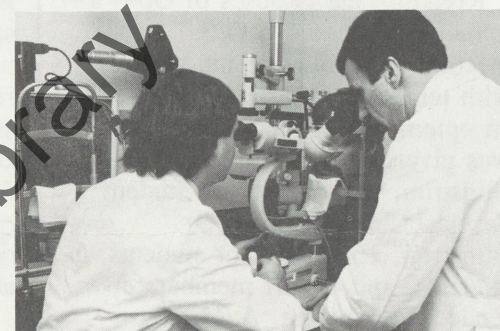

state-of-the-art products, such as a projector, OSL-2000 slit lamp, Greens III, keratometer, V-5 verometer, auto refractor and auto keratometer.

At the end of the year the equipment is made available for sale at a discount to the college, students, faculty members or alumni. Bausch and Lomb's College Lane Program will replace any sold equipment to maintain the examining lane.

Neil R. Hodur, O.D., Associate Professor of Optometry, spent time with our *Image* reporter recounting the scope of patient care - from infants on through adults - practiced in the C.L. Clinic. The clinic is known as the place to come for contact lens, most especially for those individuals who may pose a special challenge in fitting with contact lens.

The day our photographer visited the Contact Lens Clinic could be termed "family day." The above photo shows fourth-year student clinician, Robert Strasser, performing a follow-up evaluation for his brother, John, who had been fitted with rigid, gas permeable lenses. Dr. Jerold Silverman is shown to the right, utilizing a "teaching tube" to view the fit of John's contact lens.

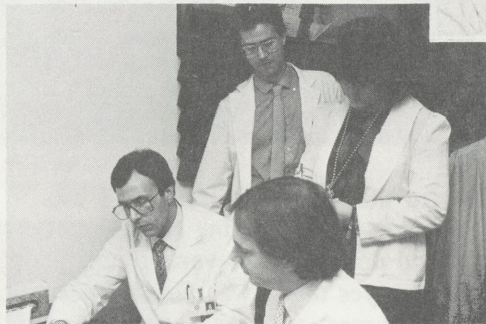

Fourth-year student clinician, Peter Russo, is shown about to administer sodium fluorescein to evaluate the fit of his brother, David's contact lens. David is eleven years of age and is in the sixth grade at Fullerton School in Addison. It is hoped David's rigid lenses will slow the advancement of his myopia. The fellow our photographer posed behind the chair is the brothers' dad, Peter.

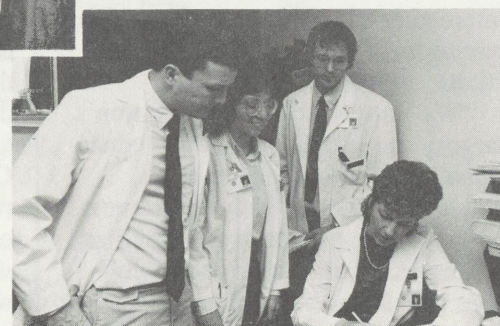

Bill Grant, second-year student, is making an appointment for a patient while Gina Cernaуска, Receptionist, and Vilma Arguelles, Contact Lens Technical Clerk discuss scheduling for the coming week. Gina has been with the clinic for two years and Vilma is a seven year veteran. Alice Gozalez, who has been with the clinic almost four years and handles clerical and reception duties, was absent the day we shot our photos.

Much of the work of the clinic takes place in the consulting office where student clinicians and faculty discuss each patient case. Shown reviewing a patient's chart are (l. to r.) (bottom) Dr. Jerold Silverman Robert Strassen, (top) Bob Irvine and Susan Matzdorf.

Dr. Janice Jurkus, Chief, Contact Lens Service, is reviewing patient materials and guiding student clinicians, (l. to r.) Steven Odekirk, Lisa Kowar and Jerry Koskinen in sharpening their diagnostic skills.

Nominate Alumni Council Director

Members of ICO's Alumni Association are invited to submit nominations for the Alumni Council Directorship, North Central Region. The North Central Region is comprised of six states; Wisconsin, Iowa, Minnesota, North & South Dakota and Nebraska. Dr. James B. Hasler currently is North Central Director and is eligible for renomination.

All Alumni Association members (regular and Century club) who have paid 1986-87 dues, as well as "Life Members," are eligible to nominate candidates.

Before submitting a name please verify the candidate's willingness to serve on the Council.

Send the names and addresses of nominees to Alumni Relations Director, ICO Alumni Office, 3241 S. Michigan Ave., Chicago, IL 60616.

Nominees

I wish to renominate the following for North Central Regional Director: (please write "yes" in the space before Dr. Hasler's name)

_____ Dr. James B. Hasler
North Central Region

or

I recommend the following individual for North Central Council Director:

Name: _____

Address: _____

City: _____

State: _____ Zip: _____

Phone: _____

Please return the above coupon to the ICO Alumni Office by March 15, 1987. Thank you!

ICO "models" for school textbook

Don't be surprised if your youngster brings home a schoolbook with pictures of an optometrist at work, courtesy of ICO.

Recently, Chicago photographer Kenji Kerins, utilized the clinic facilities of ICO for an assignment for textbook publisher, Laidlaw Brothers.

Millicent Knight, fourth-year student, posed as the optometrist in a photo which will be published, with credits to ICO, in the Laidlaw first-grade textbook series, "Journeys in Science." The books depict various activities relating to science.

The full-page photo of Millicent and the child who "played" the patient, Cindy Owsiany, appears above the text which reads:

Lara had a problem with her eyes.

She could not see small things well.

Lara went with her mother to Dr. Green.

Dr. Green examined Lara's eyes.

ICO "stars" in science textbook
Chicago photographer, Kenji Kerins, (not shown) got just the shot he needed for his assignment for the Laidlaw Brothers first-grade textbook series, "Journeys in Science." Eight-year old Cindy Owsiany posed with fourth-year ICO student, Millicent Knight, in Illinois Eye Institute's consulting examining room. The book is due to be published in early 1987.

She ordered glasses for Lara to use when she reads.

Now Lara can see things better. □

CRIS radio designed for the visually impaired

It is estimated there are 120,000 persons in the Chicago area who are print-handicapped. These are persons who are visually impaired or ill and therefore cannot rely on newspapers and magazines to receive information. That is why Chicagoland Radio Information Services, Inc., (CRIS), the broadcast service designed especially for the visually impaired person, fills an important need.

CRIS radio programs consist of volunteers reading from various Chicago publications. The broadcasts consist of not only articles, but other items such as shopping ads, classified ads, comics, community services information and other printed items.

The programs are not available to the public on regular radio receivers. Subscribers to the service utilize special receivers designed especially for CRIS programming. There is no charge for use of the receivers. CRIS radio broadcasts 24 hours per day, seven days per

week, as a subcarrier on the Chicago Board of Education's public radio station, WBEZ FM (91.5).

While CRIS serves only the Chicago area, other communities may have similar broadcast services.

For information on CRIS radio - to volunteer or secure a receiver - write or phone: Chicagoland Radio Information Service, Inc., 435 N. Michigan Ave., Suite 1146, Chicago, IL 60611; (312) 645-9800. □

Art Institute's Sargent exhibit

photo courtesy of Art Institute of Chicago

ICO is fortunate in being located in a city such as Chicago which offers world-class cultural institutions such as the Lyric Opera, Museum of Science and Industry and The Art Institute of Chicago. Students, faculty, as well as alumni, often take advantage of these, and other cultural offerings.

That is why the *Image* is taking the opportunity to alert our readers to an outstanding exhibit of over 160 oils, watercolors and drawings by John Singer Sargent, running from February 7 through April 19, at The Art Institute of Chicago, ICO's neighbor to the north, on Michigan Avenue.

If you are in Chicago this spring plan to visit this display of Sargent's luminescent portraits (his portraits of the rich and famous of the day were highly prized) and landscapes.

What:

John Singer Sargent Exhibit
February 7 through April 19, 1987

No admission fee to the exhibit (except on Tuesday when a \$4.50 fee will be charged.)

Where:

The Art Institute of Chicago
Adams at Michigan Ave.
Phone: 312-443-3600

Admission: \$4.50 (Free admission on Tuesdays) □

Spouses of Optometric Students

Recently, the Spouses of Optometric Students "S.O.S." had a meeting to familiarize the spouses with terms and instruments used by an optometrist. A half-hour lecture was given by Dr. Michael Blinstrup, Coordinator of Student Services. In addition to Dr. Blinstrup, 16 spouses of students, 4 students, and 4 staff members attended the meeting. A 24-page guide of terms and labeled diagrams designed to be useful for the layman was handed out to everyone attending.

Following the lecture by Dr.

Blinstrup on basic terminology, the spouses were then shown how to use instruments in the pre-clinic room with the help of fourth-year students Chris Olson, Michael Breen, and Larry Van Daalen. A few of the techniques shown were retinoscopy, keratometry and ophthalmoscopy. Spouses also were able to use the slit-lamp.

The optometric terminology guide provided by S.O.S. will be handed out to all spouses of students attending the meetings and may also be used as a fundraiser in the future to cover group expenses such as

postage for mailings and future events. There is also talk of updating the guide by making it more complete with inclusions of phonetics and "slang" words.

In the future the group hopes to plan a movie night during finals week and to meet monthly to discuss future events. Other activities in the past have included a volleyball tournament and an aerobics class held Mondays and Wednesdays from 7:00-8:00 p.m. in the weight room. □

ICO student on Chicago WJJD radio

Connie Mac Queen, president of the ICO Student Association, recently was interviewed by popular Chicago radio personality Clark Weber. Connie discussed ICO and the profession of optometry on the WJJD radio program, "The Clark Weber Show, Music of the Stars," which is heard each weekday from 5 a.m. to 10 a.m.

During the half-hour interview Connie discussed a wide range of optometric topics including patient care, student training, the number of women in the ICO program, and the desirability of the profession as a career. Mr. Weber also had some interesting things to say about ICO, having visited the Illinois Eye Institute on two occasions.

"We happen to have the nation's largest and oldest optometric educational institution right here in Chicago," Weber told his listeners, who number over a quarter million.

"I was given a tour of the college and I was very impressed. They put me through the eye test

ICO Student Association president, Connie Mac Queen, is shown in the WJJD radio studios with popular Chicago talk show personality, Clark Weber. Connie recently was interviewed on "The Clark Weber Show, Music of the Stars," where she discussed ICO and the profession of optometry.

for the Varilux lenses that I was going to be wearing (for a sponsor) and determined several things about my eyes that I was not even aware of. I was impressed by the exam that was given and by the thoroughness of it."

In response to Weber's queries Connie contrasted the respective roles of the three "Os" - optician, ophthalmologist and optometrist.

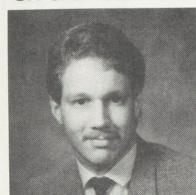

"There are many different ways we (optometrists) can treat visual problems," Connie went on to tell

the WJJD audience.

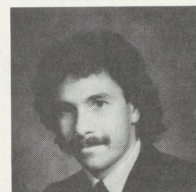

"One may be corrective lenses or contact lenses. But there are other areas we can become involved in such as... low vision (care)... sports vision... pediatrics (where) we do a lot of work with vision therapy in training (the patient) to use her eyes correctly..."

Weber concluded the half-hour interview by inviting listeners to contact the Illinois College of Optometry/Illinois Eye Institute for more information. □

Hire an ICO student this summer

While ICO fourth-year students are looking ahead to permanent positions this summer; first, second, and third-year students are wondering what they are going to be doing in June, July and August.

You can help.

Do you, or one of your colleagues, have an opening in your office which can be filled by an ICO student?

ICO students can provide assistance in various optometric functions, depending on the number of completed years of study.

Students are available to work in practices throughout the United States.

To arrange to contact a student for possible summer employment in your office contact Dr. Wodis in the Placement Office, (312) 225-1700, at your earliest convenience. Or, use the coupon below. Dr. Wodis will arrange to post your employment opportunity so that students may contact you directly.

SUMMER EMPLOYMENT

Office address:

City: State: Zip:

Office phone:

Residence phone:

Position available:

From: (date) to

Return coupon to: **Dr. H.S. Wodis**, Placement Office,
Illinois College of Optometry, 3241 S. Michigan,
Chicago, IL 60616, Phone: 312-225-1700, ext. 680.

Alumni Notes

Congratulations alumni. According to the Association of Schools and Colleges of Optometry you have an outstanding record for repaying Health Professions Student Loans following graduation.

Since future student loans availability is based on how well past loans are paid, you are to be commended for ensuring that funds will continue to be there for future ICO students in need.

Faculty news briefs

Edgar M. Fox, O.D., ICO '55, who is a lieutenant colonel in the National Guard Association of Illinois, was recently awarded a plaque in recognition of "dedicated service to the profession of Optometry in the Air National Guard." Dr. Fox is editor of the "Prairie Minuteman", a newspaper of the National Guard Association of Illinois.

Janice M. Jurkus, O.D., M.B.A., ICO '74, Chief of Contact Lens Services, spoke at the State University of New York in a continuing education course concerning contact lenses. Dr. Jurkus has recently been appointed to the editorial board of Gralla Publications' *Contact Lens Forum*, a monthly magazine.

Hyman Wodis, O.D., Monroe, '40, ICO recently welcomed back Dr. Wodis, who was hospitalized in June for a heart condition. This February, Dr. Wodis is celebrating 47 years with ICO; that includes three years as a student and forty-four years in various posts within ICO.

Congratulations to Dr. Wodis, and his lovely wife, Rose, who celebrated their 45th wedding anniversary on November 30, 1986. □

'30s

Joseph Rubenstein, O.D., NICO '39, Boca Raton, FL, retired in 1980 after practicing in Northern New Jersey since 1946. Dr. Rubenstein spends his free time fishing in Florida.

Don T. Ryan, O.D., NICO '31, Beloit, WI, has retired after 52 years of practice. He's happy to report he's feeling great and is nearing his 80th birthday. Happy Birthday Dr. Ryan!

'40s

Lester Caplan, O.D., M. Ed., NICO, '49, Birmingham, AL, was appointed Assistant Dean for Clinical Services at the University of Alabama at Birmingham School of Optometry on January 1, 1987.

Robert L. Donovan, O.D., Monroe, '47, Peoria, IL, has recently decided to retire after suffering from a heart attack in 1982 and returning to semi-practice in May 1983. He is looking for someone who doesn't have "big city glamour eyes" to fill his shoes. He had opened three rural offices in Illinois - Il Paso in 1974, Roanoke in 1987, and in 1979, Eureka. Dr. Donovan had returned to optometry in 1972 after becoming the youngest president of a private corporation in 1955 in Illinois. In Peoria, he is a board member of the Multiple Sclerosis Society and has lectured for the Heart Association and Nutrition Society.

Stan Evans, O.D., NICO, '48, Jackson Heights, NY, has recently joined in practice with his daughter, Dr. Marcie Evans Stein, specializing in pediatric optometry. Dr. Stan Evans is an associate clinical professor at SUNY College of Optometry.

Gerald Hudson, O.D., ICO '47, Galesburg, IL. One of the first commissioned optometrists in the U.S. Army, Dr. Hudson is opening a new practice in the Lincoln Mall in Urbana, IL. Dr. Hudson, formerly of Galesburg, IL, served in the army in Alaska after WW2.

Bertram King, O.D., NICO, '48, Flushing, NY. Recently Dr. King had a chance meeting with a classmate whom he had not seen in 38 years. Dr. King, who has been practicing in New York City for 35 years, visited his son in Atlanta, Georgia, where his son is a medical resident at Emory Medical School. By chance, a patient of the hospital was Dr. Benjamin Bolgia, also NICO, '48. Dr. Bolgia practices in Augusta, Georgia.

Seymour Konopken, O.D., NICO, '48, Irvine, CA, is now in semi-practice after 30 years of consulting service to the U.S. Government on the design and uses of infrared devices for surveillance and homing systems. Dr. Konopken's last assignment was in assisting the Army's Space Defense Command Program in Huntsville, AL. Dr. Konopken will now devote his time to optometric pursuits and his wife Jeanne. Both Dr. Konopken and Mrs. Konopken will also spend time with their newly arrived granddaughter, Maria Shana.

William W. Madden, O.D., NICO '48, Mountain Home, AZ. After practicing for 30 years in Brighton, MO, Dr. Madden retired in September of 1985 to sunny Arizona.

H. E. Smith, O.D., ICO '48, Moline, IL, was appointed to the Board of Directors of the Coal Valley-South Moline Rotary Club. Dr. Smith has held the office of president in the past and has been a member for 28 years of various Rotary clubs. In addition to three sons, Dr. and Mrs. Smith have two daughters, both of whom are qualified optometric technicians.

'50s

Charles Drucker, O.D., CCO, '50, Pacifica, CA, attended an impromptu reunion in December on the island of Hawaii with two former classmates. Dr. Drucker, Dr. Joe Shimamura, and Dr. Dan Fujisaki met during the annual Hawaiian Optometric Association meeting. All doctors are still practicing today.

Kenneth Gasworth, O.D., CCO, '50, Closter, NJ. Dr. Gasworth is in his second year of a three year term on the town council in Closter.

Donald L. Heyden, O.D., NICO '50, Kenosha, WI. Congratulations are in order for Dr. Heyden, who in November won the President's Award presented to him by the College of Optometrists in Vision Development. Dr. Heyden, who specializes in vision problems, related to learning disabilities and behavioral disorders, was honored at the College's annual meeting held in San Diego, CA.

'60s

Sanford E. Blas, O.D., ICO '64, Baltimore, MD, has been appointed to serve on the Optometry's Examination Construction Committee for the Visual Biology-Ocular Disease/Trauma Section of the National Board of Examiners. Dr. Sanford is presently serving as President of the Maryland State Board of Examiners in Optometry.

'70s

Mark T. Dean, O.D., ICO '76, Socastee, Myrtle Beach, SC, has recently set up private practice in Myrtle Beach after working with his father in a professional association in Sparta, MI for 5 years. Mark, along with his wife Sandy, son Andrew (6), and daughter Jennifer (2), are enjoying the warmer weather of Socastee. Mark has become a member of the Rotary, Lion Club and of Toastmasters. He is a professional member of OEP, COVD, AOA, and is also an Adjunct Professor for the College of Optometry in Memphis, TN, allowing students to complete their externship in his office. He is also a candidate for the Horry County School Board in his home town.

Brian J. Hammes, O.D., ICO '74, Fond du Lac, WI, has achieved the rank of 1st degree blackbelt in Tae Kwon Do at Cho's Black Belt Academy, the world's largest martial arts school. To do this, Dr. Hammes had to learn 28 forms, each containing 19-38 movements -- or 532-1,064 movements in all! He also had to break eight boards that were placed in four different positions. Brian also had to attend 26 Red/Black Belt seminars and write a thesis. If writing a paper wasn't bad enough, Brian had to prove himself by physically fighting three persons simultaneously.

Jeff Koreman, O.D., ICO, '75, Colorado Springs, CO, was assigned on October 1 as Chief of Optometry Series at the United States Air Force Academy in Colorado Springs.

Thomas J. Poswilko, O.D., ICO '79, Dickson, ND, and his wife Marlene, are pleased to welcome into the world their second son, Kevin James. Kevin was born July 28, 1986 and weighed in at 7 lbs. and 7 oz.

Carol A. Schwartz, O.D., M.B.A., ICO '78, Chicago, IL, was recently appointed technical editor of *Contact Lens Forum*, Gralla Publications.

Harold V. Steinman, O.D., ICO '76, Flint, MI, and his wife Debby, are pleased to announce the birth of their second daughter, Tamara on October 16. Tamara's older sister, who is 1 1/2, is Rebecca.

'80s

David L. Boyer, O.D., ICO '83, Midway, UT, and his wife Barbara, now have a baby brother for their daughter Lauren who is four years old. Justin was born August 25, 1986.

Gary Edwards, O.D., ICO, '82, Sunnyvale, CA. It will be a bright start of the new year as Dr. Edwards makes a move from Precision-Cosmet Co. in Minnetonka, MN to Barnes-Hind in Sunnyvale, CA, as Director of Professional Services.

Peter L. Emer, O.D., ICO '80, Kenosha, WI, and his wife Kim are proud to announce their third child, Elizabeth Marie born in March. Elizabeth is lucky enough to have two older brothers to show her the ropes - Nathan, five, and Benjamin, three. Dr. Emer has a private practice in Kenosha.

Captain Theodore J. Fulton, O.D., M.S., ICO, '80, Harker Heights, TX. Last year was a busy year for Captain Fulton, O.D. In August he received his Masters of Science degree from the American Technological University in Killen, Texas with an emphasis on Human Resource Development. In early December, Captain Fulton attended a program in Washington, D.C. given by key personnel of the Surgeon General's office, the Department of the Army and the Department of Defense. Captain Fulton was selected the outstanding junior officer by his command. He is currently assistant Chief of Optometry at Darnell Army Community Hospital in Fort Hood, Texas.

Kevin Goldstein, O.D., ICO, '86, And Marcie Oleinick, O.D., ICO '86, were married September 28, 1986 in Southfield, MI. Dr. Goldstein is practicing in a Detroit suburb and Dr. Oleinick is working for Greenfield Health System which is associated with the Henry Ford Hospital. Congratulations Doctors!

Paul C. Lueck, O.D., ICO '81, Darlington, WI, and his wife Kristie have a new two-month old baby girl, born on November 4 at 11:54 p.m. and weighing 5 lbs. and 10 oz. Lana Joan is the Lueck's second child, the first in Ian.

Brent G. Ostoich, O.D., ICO '86, Morton Grove, IL, has just been named to be included in the 1986 edition of *Outstanding Young Men Of America*. The OYMA program honors young men between the ages of 21 and 36 who have distinguished themselves in fields such as service to community, professional leadership, academic achievement, cultural accomplishments, and civic and political participation. Dr. Ostoich was selected along with others from North America, from a group of 150,000 nominations. Congratulations Dr. Ostoich!

Joyce R. Saloman, O.D., ICO '82, Boca Raton, FL, and **Steven H. Schwitzman, O.D., ICO, '82**, are proud to announce the birth of their first child, Tara Eve born on September 23, 1986. Tara was probably the first baby to be born with a silver occluder in her hand. Dr. Tara Soloman, ICO 2012? □

Alumni Notes

Published by the Illinois College of Optometry Library

The Illinois College of Optometry Library is pleased to announce the publication of the first issue of the Alumni Notes. This publication is a quarterly journal that will provide a forum for the exchange of ideas and information among the alumni of the college. The first issue contains articles on a variety of topics, including the history of the college, the current state of the profession, and the future of optometry. The journal is intended to be a valuable resource for all alumni and a means of keeping them informed of the activities of the college.

The Illinois College of Optometry Library is a non-profit organization that is dedicated to the advancement of the profession of optometry. The library's primary purpose is to collect, organize, and make available to the public the books, journals, and other materials that are necessary for the study and practice of optometry. The library is also responsible for the maintenance and preservation of its collection. The library's activities are supported by the Illinois College of Optometry and by the contributions of its alumni and friends.

The Illinois College of Optometry Library is a member of the American Library Association and the Association of College and University Libraries. The library is also a member of the Illinois College of Optometry and the Illinois College of Optometry Library Association. The library's activities are supported by the Illinois College of Optometry and by the contributions of its alumni and friends. The library is a valuable resource for all alumni and a means of keeping them informed of the activities of the college.
